PROFESSIONAL EXPERIENCE

Wilcon Depot, Inc

Dec 2025 - Present

Junior Systems Developer

Libis, Quezon City

- Developed an **automated count tag generation system** capable of **instantly producing bulk count tags**, automatically **storing data** in the database, and **exporting reports** in PDF or Excel formats.
- Implemented an **offline-capable data storage solution** using **IndexedDB**, enabling **seamless local data handling** and **database synchronization** during network interruptions.
- Integrated a **location-based data filtering system** that automatically displays **branch-specific data** to **users** based on **registered IP addresses** stored in the database across **110+ branches**.

Aboitiz Foods Group

Jan 2025 - Mar 2025

Software Developer Intern

Bonifacio Global City, Taguig

- Developed a customer-facing **web application** utilizing the **jQuery framework** to streamline payment request processing and improve overall user efficiency.
- Established a data pipeline with **Google Sheets** for real-time data persistence and connected the app with automated **Google Drive** integration for secure multi-file uploads.

Schneider Electric Philippines

Jun 2023 - Jul 2023

Digital Transformation Intern

Rosario, Cavite

- Developed the **User Interface (UI)** for a **3D truck container filler** using **Unity and C#**, enabling operators to visualize and optimize container box positioning.
- Contributed to the development and integration of core system functionalities, directly enhancing the overall **logistics efficiency** and operational flow.

EDUCATION

Bachelor of Science in Computer Engineering

2020 - 2025

Adamson University

Ermita, Manila

- Awarded the **Rank 9 St. Vincent de Paul Leadership Award** for sustained excellence in **student leadership**, serving as an **Executive Officer** in the **Student Government**, **Student Council**, and **Recognized Student Organizations** throughout college.

PROJECT EXPERIENCE

Keynergy: Solenoid-Based Energy-Harvesting Mechanical Keyboard

Jan 2025 - May 2025

- Designed and built an **IoT-enabled mechanical keyboard** that **generates electricity from keystrokes**, **processes real-time input** via a **Raspberry Pi Pico**, and **visualizes synchronized keypress data** through a **C# GUI backed by Firebase** for low-latency communication.

TECH STACK

- Frontend:** HTML5, CSS3, Javascript, jQuery, React, Next.js, Vue.js, Typescript, Tailwind CSS, Buefy
- Backend:** PHP, Python, Laravel, C#/.NET, Infor M3, Cron jobs, REST API, MVC
- Database:** MySQL, MySQLite, Dbeaver, Firebase
- Tools:** Git, Github, Visual Studio, Visual Studio Code, Google Colab, Arduino IDE, N8N
